

Zachman Framework

The Zachman Framework is known for a solid history of helping enterprises collate, organize and structure their intellectual capital.

Sparx Systems' MDG Technology underpins the organizational viewpoints and structures of the Zachman Framework with great depth, breadth and modeling integrity.

Sparx Systems Enterprise Architect models are based on the UML 2.5 standard, with extensions for requirements modeling, testing, project management, mind mapping, and much more.

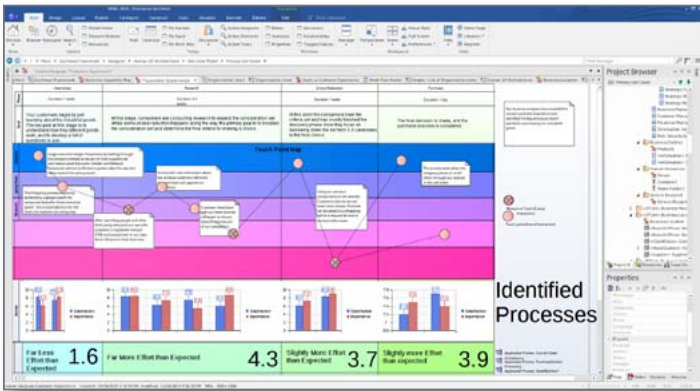

"I have been testing Zachman Framework add-in for EA, which is brilliant!"

Clive Finkelstein
Managing Director
Information Engineering Services Pty Ltd

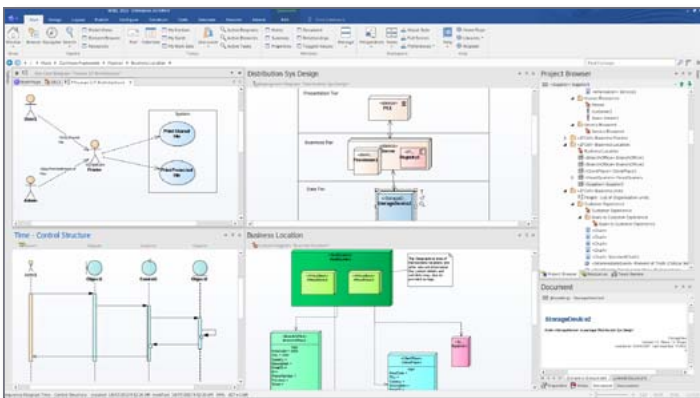

Sparx Systems provides compelling support for the Zachman Framework

Zachman Framework

MDG Technology for Zachman Framework:

- Provides a powerful planning device to the enterprise
- Helps align Business with IT by providing end-to-end traceability from strategic business goals to implemented solutions
- Simplifies enterprise documentation with visual models that are built on open standards and readily understood by non-IT people
- Provides an integrated, scalable approach to documenting enterprise-wide information architectures.

Features:

- A visual, clickable interface for the Zachman Framework
- Hierarchical model structures that support each cell within the framework
- UML profiles for Business Scorecards, Mind Mapping and Business
- Process modeling
- Useful model starters to help you become productive quickly
- Framework-specific model validation to help ensure consistency and correctness
- Cluster Report and Process Map generation to facilitate strategic project planning
- Detailed example model

Available preinstalled in:

- Ultimate Edition*
- Business and Software Engineering Edition*

*Requires EA version 12.1.1228 (or later)

Align your strategic business goals and IT solutions

*"I am so impressed with what they have done, I am planning to demonstrate their product in my "Rapid Delivery of Enterprise Architecture Maturity" workshops throughout the world."
Clive Finkelstein, International expert in Enterprise Architecture*
